

In your first lab (linked list), there are so many similar submissions.

Lab instructions are clear; each lab work is designed for only a single person.

As you have been warned countless times before, unfortunately, you are not allowed to work with your friends.

Also you can not copy/paste a code piece from a website (even if you change/adapt it later).

Grades of groups of 2 to 4 people are reduced dramatically.

Grades of students who have submitted very similar code with 10 or more students are fixed to 30.

Grades of students who have submitted very similar code from a website are fixed to 30.

If you sure your work is not similar to anyone, you can object your grade. However if you are wrong, your grade will be reduced to 0.
